## Experience

### Frontend Developer

Full Stack Team

03/2023 - 06/2024

Developed a variety of projects, ranging from statistical services to entertainment apps, used by a large user base.

Responsibilities:

- Designed project architecture using React
- Developed responsive, functional frontend components
- Translated Figma UI/UX designs into live applications
- Implemented RESTful APIs for seamless integration
- Collaborated with product managers, designers, and backend developers

### Full Stack Developer

CS 2 CIS

08/2022 - 12/2022

Worked at the largest CIS company specializing in tournament and LFG systems for CS:GO and CS2 players.

Responsibilities:

- Developed client and server-side components using React.js and Node.js (Express)
- Integrated third-party APIs like Discord Auth for user authentication
- Designed gamer-focused UI/UX for the website using Figma and Photoshop
- Displayed user account information, including gaming stats and profile details, in the UI
